EDUCATION

DipIT/2016

Nilai University, Malaysia

ABOUT

Looking for a React developer role where I can leverage my expertise to develop and deliver cutting-edge web applications that creates impact.

PROJECTS

Pro-repo: *A Powrfull repo Management App*
React.js | Node.js | MongoDB | JWT | Context API | Tailwind CSS

- Users can easily create, update and delete repository as needed.
- Users can only see the repository they have created, ensuring that repo information is kept private and secure.
- Intutitive and user friendly interface that helps anyone to effortlessly navigate the app and effectively organize their repository.

Live Site || **Source Code**

Cineverse: *A Colorful Movie Information Website*
React.js | Rest-API | Responsive | SASS

- Utilizes the comprehensive and up-to-date data from TMDB's API to provide users with a rich and immersive movie and TV show browsing experience.
- Enables users to easily search for new titles, as well as to view detailed information about individual titles, including ratings, reviews, cast and crew information, and more.
- It has a visually stunning and fully responsive design that provides users with an optimal viewing experience across a wide range of devices,
